

# Welcome to Kernel Testing & Dependability MC

Arisu Tachibana  
KernelCI / Gentoo / etc.

# UAPI testing with KUnit

- Thomas Weißschuh

# Kselftests augmented: running kernelspace tests from userspace

- Ricardo Cañuelo

# KFuzzTest: Targeted Fuzzing of Internal Kernel Functions

- Ethan Graham

# SYZOS: Practical KVM fuzzing

- Alexander Potapenko

# Break

- We are currently in a break until 16:50

# **syzbot ci: continuous patch series fuzzing**

- Aleksandr Nogikh

# Automating Scope-Based Resource Cleanup with Coccinelle

- Erick Muthama

# The singularity is here for testing: genai advancements on kdevops

- Luis Chamberlain

# **KernelCI kci-dev: Closing the developer feedback loop**

- Arisu Tachibana

# A fast path to benchmarking

- Mark Brown

# Thank You !
